

FEATURES

- Dielectric strength 2500Vrms
- Blocking voltage 600V
- Zero cross or random turn-on
- Photo isolation
- Led status indicator
- Built-in snubber

DESCRIPTION

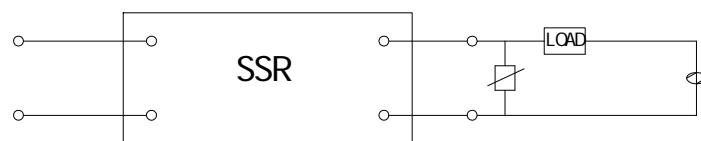

This SPST-NO printed circuit board mount SSR provides AC output switching in a high density package. The MS2's DC input is compatible with 5, 12 and 24V logic systems. The relays include a LED indicator to provide input status information. All models include an internal snubber. The relays provide 2500Vrms opto-isolation, between input and output. Encapsulation, thermally conductive epoxy.

APPLICATIONS

- I/O interface
- Programmable controllers

PRECAUTIONS

1. Soldering must be completed within 10 seconds at 260°C or less or within 5 seconds at 350°C or less.
2. The SSR case serves to dissipate heat. Install the relays so that they are adequately ventilated. If poor ventilation is unavoidable, reduce the load current by half.
3. When using the MS2 series for an AC load with a peak voltage of more than 450V, connect the load terminals of the relay to an inrush absorber (varistor). The recommended varistor voltage, 440 to 470V.
